EDUCATION

MCMASTER UNIVERSITY
B.Eng. Computer Engineering (Co-op)
2017 – 2021 (Expected)

Dean's Honour List

Related Courses:
Logic Design, Circuit Analysis, Data Structure

SKILLS

Languages
Python, C, JavaScript, Java, HTML, CSS, C++, LATEX, MATLAB, Verilog

Frameworks/Libraries
Node.js, Express.js, Angular.js, MySQL, MongoDB, Git, Bash, AWS, OpenCV, SciPy, Tensorflow

Hardware/Tools
Arduino, Raspberry Pi, Oscilloscope, Soldering

Graphic Design
Photoshop, AutoCAD, Autodesk Inventor

VOLUNTEER

Set-up and Information
First Robotics at McMaster, Hamilton ON
April 2018
- Set up, promoted social in the pits and stands, directed people from DBAC to the Hall, and provided information service to the passing visitors and participants

AWARDS

Top 3 & Best Pitch
McMaster IMPACT Project
Dec 2017
- Top 3 teams among 1st year engineering students

WORK EXPERIENCE

Application Developer, Faculty of Health Sciences   May 2018 – Aug 2018
McMaster University, Hamilton ON
- Developed a web application to facilitate more efficient generation of clinical simulation scenarios used to train health care providers, decreased the generation time by 50%, built with **Node.js**, **Express**, **MongoDB**, and **Bootstrap**
- Migrated the application and existing simulation data from internal data centre to **AWS**

Mathematics & Physics Tutor   Jan 2018 – May 2018
MacBridge Academy, Hamilton ON
- Worked on tutoring students from grade 4 to 12 in Math and Physics courses

Embedded Software Engineer Intern   July 2017 – Aug 2017
Wingtech Technology Co.Ltd., Shanghai, China
- Researched, designed and integrated scalable applications of VR headset in **C**
- Implemented software requirement analysis and testing for RTOS on the headset

PROJECTS

Iris at UtraHacks 2018   Nov 2018
- Developed a gesture controlled music player with RGB visualizer
- Used three IR sensors and one webcam (with **OpenCV**) as the gesture control module, integrated Spotify **Web API** and used **signal processing (SciPy)** to generate spectrum from system audio input and encoded it to RGB Led array, built with **Python** and **C**

Driver Attention Alert System   Oct 2018
- Developed an alert system to detect drowsy driving when CAV and ACC tech is enabled
- Used eye-tracking with web-cam as well as 8 linear pressure sensors and vibration motors integrated on a steering wheel, built on **Raspberry Pi** and **Arduino**, with **OpenCV** and **ML**

Music'o at Hack the Valley II   Feb 2018
- Worked in a team of 4 to develop a web application called Music'o, which aimed at helping people relax their mind, mood and body by playing music according to the weather in the current city
- Built in **HTML**, **CSS**, and **Javascript** with Yahoo weather, geolocation and Spotify API

EXTRACURRICULAR ACTIVITIES

PR Manager and Computer Vision & AI Team Member
MAC RoboMaster Team   Sep 2018 – Present
- Represent McMaster University to participate in the DJI RoboMaster Robotics Competition
- Authored grant proposals to secure funding and prepared marketing materials to bring in new sponsors
- Work with computer team on neutral network training, data scraping and RC software
- Implemented **CV**(stereo vision distance measurement and auto-aim) modules on two fully-autonomous robots in **C++**, and improved the aiming accuracy by 30%

President
McMaster Sumobot Club   April 2018 – Present
- Coordinate the executive team, organize club events and communicate with school departments
- Host tutorials and 2 sumo-robot competitions of over 300 participants
